

Cinematic Toolkit

$9+

99Sounds

160 essential cinematic sounds, handpicked from the premium Flame Sound catalog.

I've been getting dozens of emails and comments from 99Sounds users asking the same thing:

"Is there a way I can support what you're doing?" "Do you have a premium version of the cinematic pack?"

Well, now that I've removed all ads from the site, I've put together this pack for the people who've been asking.

You can get some of the best sounds I've ever created while also supporting 99Sounds.

Cinematic Toolkit is a curated selection of 160 sounds pulled from my premium Flame Sound catalog. This is not a dump of random files. I handpicked an intentional collection of the cinematic essentials I reach for most often in my own projects.

You can check out one of the included sequences below.
